

APPENDIX B: WALES LOCAL BIODIVERSITY ACTION PLAN SUMMARY

The attached table, prepared by the Wildlife Trusts Wales on the basis of information supplied by Local Biodiversity Action Plan (LBAP) partnerships, summarises information on the habitat and species action plans that are included in published or planned LBAPs (as at November 2001).

Terrestrial and Marine Habitats

Are listed hierarchically, with habitats recognised as UK priorities highlighted in **bold**. All habitats that are shaded grey are currently under consideration for UK or Wales action plans.

All un-highlighted habitats are local priorities, where Action Plans or Statements exist or are planned. Three new broad habitat categories - Mosaic habitats, Post Industrial land, and Urban and Built Environments – have been added to the UK categories to cater for grouping a number of these local priority habitats.

Terrestrial and Marine Species

Species names for which action plans or statements exist, or are planned, are listed in descending taxonomic order, and within each group, in alphabetical order by common name. Each **bold** highlighted species is considered a priority in Wales.

All species that are shaded grey are currently under consideration for Wales action plans. All un-highlighted species are local priorities.

For all species marked with an asterisk, the Countryside Council for Wales is the lead agency or national contact organisation.

Action being taken

To indicate what action is being undertaken by each of the LBAP partnerships, four notations have been used:

1. X = a draft or complete Action Plan exists.
2. P = an Action Plan is planned.
3. S = a Habitat or Species Statement exists.

4. Where action for a species is planned or being addressed through one or more Habitat Action Plans, the species is listed with an abbreviation of one of the specified habitat(s) as the notation, e.g. Rb for Reedbed, W for Woodland, to indicate this. These abbreviations have been listed next to the habitat title in the Habitat Action Plan listing.

Number of Action Plan Calculations

The numbers bracketed next to the habitat or taxa title are the number of priority habitats or species, highlighted in **bold**; or habitats or species of local importance, un-highlighted, used to calculate the total number of action plans in each section.

Appendix B contains a table that is in an unsuitable format for publishing to the Web, but is available on request.
